Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: DE-A-4022087

The document D1 is regarded as being the closest prior art. In D1 a solution different of water is used for generating bubbles enclosing the pollutants, the bubbles being frozen in second step. The subject-matter of claim 1 discloses a process wherein pure water is used for generating snow and the pollutants are adsorbed on the snow. The subject-matter of claim 1 is thus new (Article 33(1)(2) PCT).

The process of the invention does not have the problems derived from the use of compounds different to water and is based in the adsorption properties of the snow even for very small pollutants. Such an effect was not described or suggested by the prior art. Accordingly, the subject-matter of claim 1 involves an inventive step (Article 33(1)(3) PCT).

Similar reasoning applies, mutatis mutandi, to the independent claim 32, directed to an installation for implementing the process of claim 1.

Claims 2-31 and 33-57 are dependent on claims 1 and 32 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
